

Dinga Water - Saving Jet Spray Gun

No. 1 In food safety

The couplings for the Dinga watergun are manufactured in chrome plated brass. The couplings must be ordered separately depending on the hose size.

For 1/2 inch hoses select these couplings:
0701 + 0712.

For 3/4 inch hoses select these couplings:
0715 + 0716 + 0717.

The water gun is available in six colours – add the colour code after the item number.

Dinga Water - Saving Jet Spray Gun

The Dinga Watergun will considerably reduce consumption of both hot and cold water.

Squeezing the trigger determines the jet pattern, thereby rendering the watergun suitable for many different cleaning applications.

Technical specifications for 0711:

Working pressure: max 25 bar
Water temperature: max. 80° C.
Approximate throughput: 25 l/min. (5 bar pressure)
Available for hose diameter: 1/2" and 3/4".

The water gun is available in six colours

Hoses with 3 couplings; 0700, 0701 and 0703.

Item no.:	Dimensions:	Materials:	Temperature:
Water gun:			
0711		Brass, stainless steel, rubber	60°C
Coupling:			
0701	1/2"	Chromium-plated brass	-30°C - +100°C
0712	1/2"	Chromium-plated brass	-30°C - +100°C
0715	3/4"	Chromium-plated brass	-30°C - +100°C
0716	3/4"	Chromium-plated brass	-30°C - +100°C
0717	3/4"	Chromium-plated brass	-30°C - +100°C
Hose:			
0702	15 m	Reinforced PVC	60°C
